Development Impact Analysis:

1. **Land Use Compatibility**

This Council-initiated zoning change request is intended to align the existing land uses, future land use map, and zoning. The process for Council-initiated rezoning was adopted in November 2000 regarding the procedure for City-Council-initiated rezoning. The procedures involve:

- Verifying the zoning changes are consistent with the City's Comprehensive Plan (8/2014);
- Providing for the Planning Department to brief the City Council on the proposed zoning changes, after which the City Council shall indicate whether or not it wishes to initiate the proposed zoning changes; (10/21/14), and
- Placing an appropriate Mayor and Council Communication on the agenda for the next regular City Council meeting authorizing the Planning and Development Department to prepare and submit an appropriate rezoning application (10/28/14), which shall schedule the application for the next available public hearing by the Zoning Commission (11/12/2014).

The subject area covers 69.18 acres and approximately 4 parcels. The request is to rezone the area to correspond to existing land uses, in accordance with the future land use. On the basis of existing land uses, the proposed zoning change **is compatible** with the surrounding land uses.

2. **Comprehensive Plan Consistency**

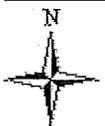

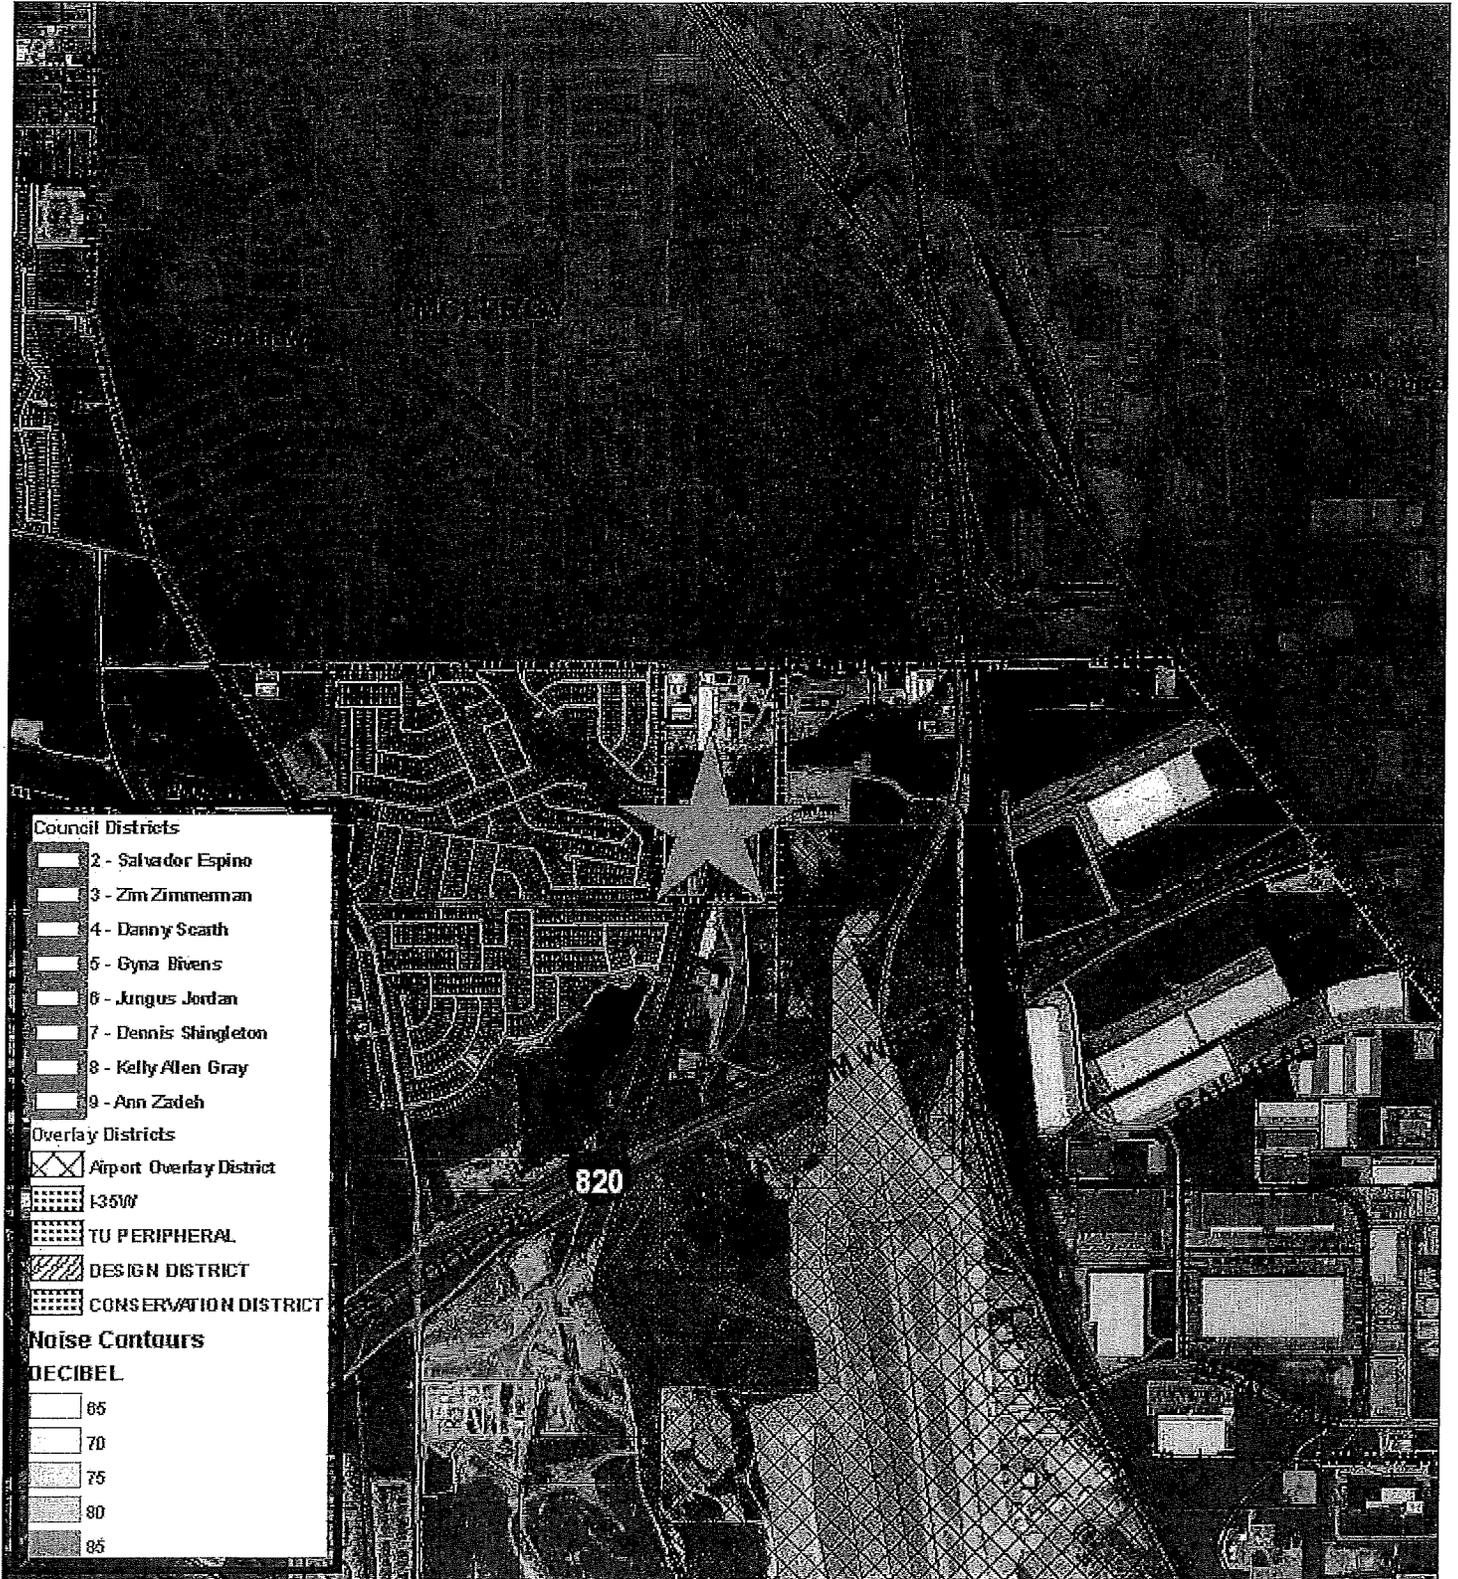

The 2014 Comprehensive Plan designates the subject property as light industrial. The requested zoning classifications are appropriate for the land use designations, with an amendment for the northern portion to heavy industrial.

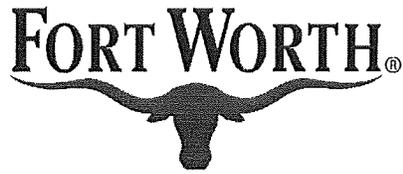

Based on an amendment to the future land use map, the proposed zoning **is consistent** with the Comprehensive Plan.
