RE: WaterSMART Feasibility Study Grant Application – City of Fort Worth, Texas

Dear Mr. Crumb:

The Tarrant Regional Water District (TRWD) supports the City of Fort Worth (Fort Worth) application for a WaterSMART Feasibility Study Grant to evaluate opportunities to provide reclaimed water to central Fort Worth and the Trinity River Vision Uptown/Central City Project.

As the raw water provider for Fort Worth and other surrounding cities, TRWD strongly encourages water conservation and efficiency measures, including water reuse, that serve to defer the need to import additional supplies to our service area or reduce the need to pump raw water from East Texas reservoirs. In addition, as the local sponsor of the Trinity River Vision project, TRWD supports Fort Worth's efforts to evaluate the feasibility of using highly treated reclaimed water for evaporative makeup and water quality enhancement for the Uptown/Central City project.

TRWD supports this effort of the City of Fort Worth and offers to contribute \$32,000 to assist in funding this important study.

Sincerely,

James M. Oliver
General Manager
