

Victory Forest Community Center Public Art Project

Artist Art Garcia's Narrative Description

Zarape celebrates everyone in the community – who contributed to its diversity and growth.

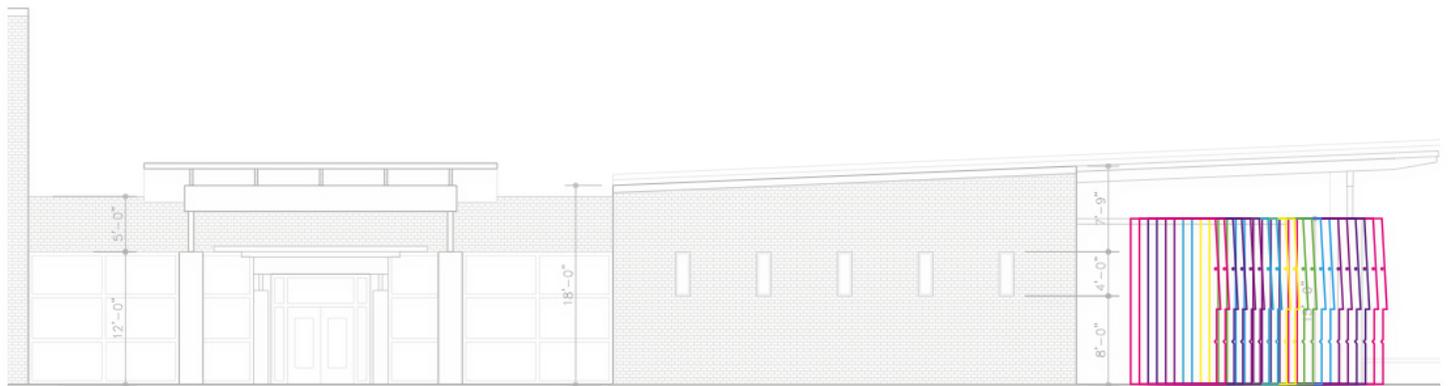

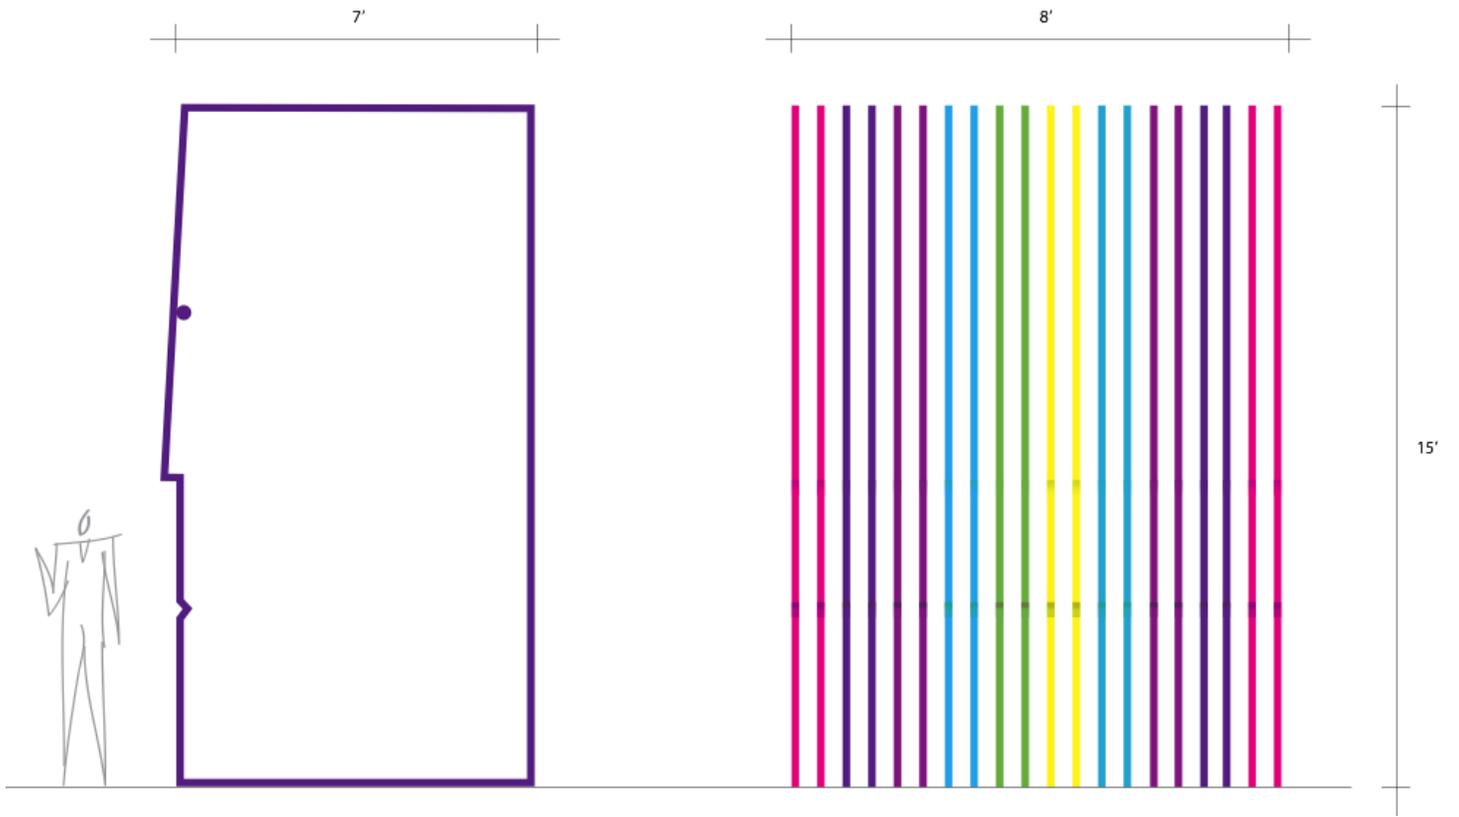

Twenty profiles reflect those in industry, education, business, and our youth – the future. Like the *Sarape*, made of vibrant colors, so too, the various members of Victory Forest add to its vitality. Its colorful citizens included rail road workers, steel mill workers, Sisters, teachers and business leaders. The community boasted modern homes and transportation of the day in addition to progressive industry and educational standards. The sculpture will provide today's citizen a sense of pride, as they learn, they are part of its continued history.

Sculpture Details

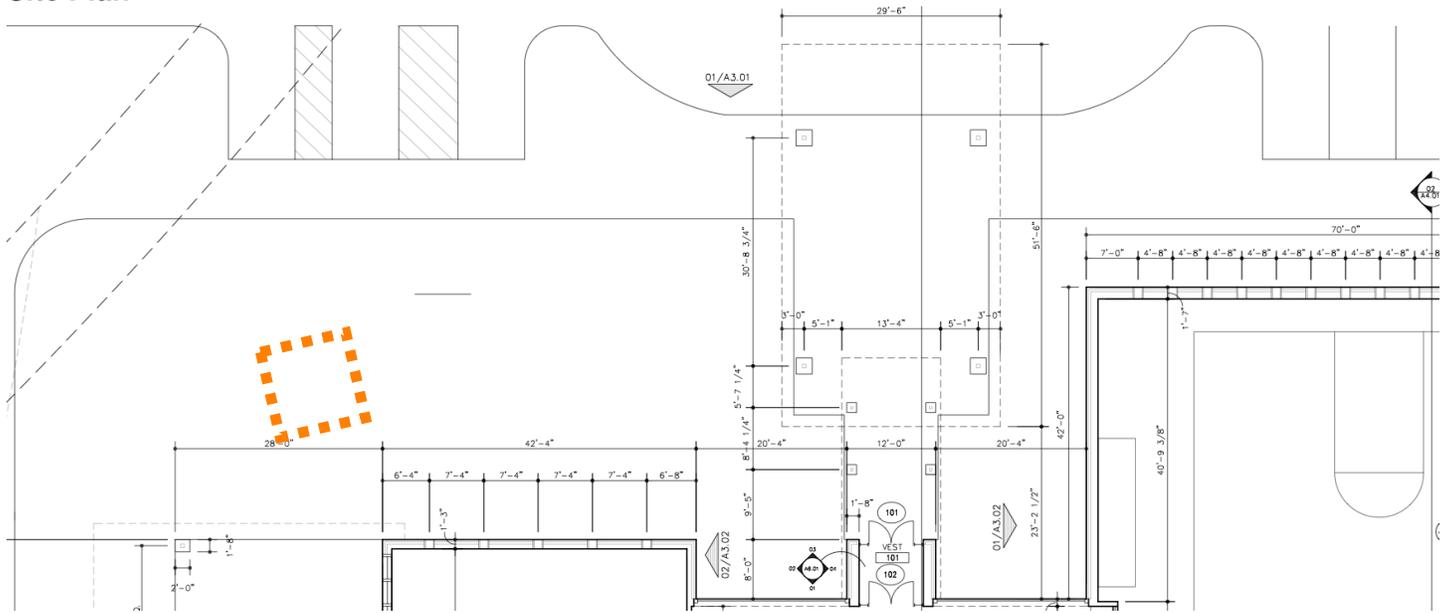

20 – 7' x 15' profiles will be fabricated in metal tubing. At 8" apart, the free-standing sculpture is a total of over eight feet wide. The painted profiles will complement its environment with its bold colors. *Zarape* will sit on a grassy knoll, located west of the main entrance and north of the fitness room, allowing visibility from Hemphill Street, the park area and W. Bewick Street.
