STANDARD NOTES:  
Water / Wastewater Impact Fees  
The City of Fort Worth has an ordinance implementing the assessment and collection of water and wastewater impact fees. The total amount assessed is established on the recordation date of this plat application, based upon schedule I of the current impact fee ordinance. The amount to be collected is determined under schedule II then in effect on the date a building permit is issued, or the connection date to the municipal water and/or wastewater system.  
Construction Prohibited Over Easements  
No permanent buildings or structures shall be constructed over any existing or platted water, sanitary sewer, drainage, gas, electric, cable or other utility easement of any type.  
Utility Easements  
Any public utility, including the City of Fort Worth, shall have the right to move and keep moved all or part of any building, fence, tree, shrub, other growth or improvement which in any way endangers or interferes with the construction, maintenance, or efficiency of its respective systems on any of the easements shown on the plat, and they shall have the right at all times to ingress and egress upon said easements for the purpose of construction, reconstruction, inspection, patrolling, maintaining, and adding to or removing all or part of its respective systems without the necessity at any time of procuring the permission of anyone.

Site Drainage Study  
A site drainage study, showing conformance with the approved roadway drainage plan, may be required before any building permit will be issued on this site (a grading plan in some instances may be adequate.) If the site does not conform, then a drainage study may be required along with a CFA for any required drainage improvements and the current owner shall submit a letter to the Department of Transportation and Public Works stating awareness that a Site Drainage Study will be required before any permit is issued. The current owner will inform each buyer of the same.  
Floodplain Restriction  
No construction shall be allowed within the floodplain easement, without the written approval of the Director of Transportation and Public Works. In order to secure approval, detailed engineering plans and/or studies for the improvements, satisfactory to the Director, shall be prepared and submitted by the party(ies) wishing to construct within the floodplain. Where construction is permitted, all finished floor elevations shall be a minimum of two (2) feet above the flood elevation resulting from ultimate development of the watershed.

Flood Plain/Drainage-Way: Maintenance  
The existing creek, stream, river, or drainage channel traversing along or across portions of this addition, will remain unobstructed at all times and will be maintained by the individual lot owners whose lots are traversed by, or adjacent to, the drainage-ways. The City of Fort Worth will not be responsible for the maintenance, erosion control, and/or operation of said drainage-ways. Property owners shall keep the adjacent drainage-ways traversing their property clean and free of debris, silt or other substances which would result in unsanitary conditions, and the City shall have the right of entry for the purpose of inspecting the maintenance work by the property owners. The drainage-ways are occasionally subject to storm water overflow and/or bank erosion that cannot be defined. The City of Fort Worth shall not be liable for any damages resulting from the occurrence of those phenomena, nor the failure of any structure(s) within the drainage-ways. The drainage-way crossing each lot is contained within the floodplain easement line as shown on the plat.  
Building Permits  
No building permits shall be issued for any lot in this Subdivision until an appropriate CFA or other acceptable provisions are made for the construction of any applicable water, sewer, storm drain, street lights, sidewalks, or paving improvements; and approval is first obtained from the City of Fort Worth.

Public Open Space Easement  
No structure, object, or plant of any type may obstruct vision from a height of 24-inches to a height of 11-feet above the top of the curb, including, but not limited to buildings, fences, walls, signs, trees, shrubs, cars, trucks, etc., in the public open space easement as shown on this plat.  
Sidewalks  
Sidewalks are required adjacent to both sides of all public and private streets, in conformance with the Sidewalk Policy per "City Development Design Standards".  
Private Common Areas and Facilities  
The City of Fort Worth shall not be held responsible for the construction, maintenance or operation of any lots containing private common areas or facilities identified as such on this plat. Said areas shall include, but not be limited to: private streets, emergency access easements, and gated security entrances; recreation areas, landscaped areas and open spaces; water and wastewater distribution systems and treatment facilities; and recreational clubhouse/exercise buildings and facilities.  
The land owners and subsequent owners of the lots and parcels in this subdivision, acting jointly and severally as a land owners association, shall be responsible for such construction, reconstruction, maintenance and operation of the subdivision's private common areas and facilities, and shall agree to indemnify and hold harmless the City of Fort Worth, Texas, from all claims, damages and losses arising out of, or resulting from the performance of the obligations of said owners association, as set forth herein.
